ethos BUSINESS

Innovative, fully featured digital business communication technology

LiveOn, the innovative, fully featured digital business communication technology is today the ideal platform for organizing digital conferences and exhibitions, running business presentations, meetings, events, and planned B2B and B2C meetings while meeting the modern, critical business needs that arose because of COVID-19 pandemic.

LiveOn, is a culmination of ethosGROUP's extensive experience (over 30 years) in vertical cutting-edge markets (health, medicine, insurance, economy, etc.), the **combined know-how** of the group's team in both digital information and communication as well as in the organization of industry information and networking events, and the **group's management strategic perception**, to create substantial global networking opportunities for companies and professionals.

Designed for every type of event and fully adaptable to its needs, LiveOn transforms seamlessly the entire business communication experience, offering unique opportunities for professional networking and targeted business promotion. **Built with Customer Success in mind**, LiveOn utilises advanced web technology, is based on a secure cloud environment, is offering a quick & friendly user

interface to organisers and participants, and -last but not least- is a subscription based service with scalable cost.

With LiveOn, the average business has the opportunity:

- to promote their products and services and announce their activities even when physical contact is not possible,
- to communicate individually and online with audiences they are interested in as well as with their market partners,
- to take advantage of the impressive communication potential of digital technologies not only in virtual and hybrid but also in live events.

LiveOn combines in a web app, easily accessible via desktop, laptop and mobile devices,

- **quick setup and management** of corporate and professional events and activities, fully customizable according to organizer's branding and marketing needs,
- **secure** (with end-to-end data encryption and advanced security features) **and unobstructed browsing** in an organized environment that provides ongoing information, networking and promotion opportunities,
- **full digital integration** of functional features of live events (booths, cards, promo material, interpretation etc.), so that they produce instantly and after the end of each event detailed data insights,

An organized user journey. At LiveOn, participants may attend anything -from seminars and presentations to integrated conference programs-, interact with each other through video calls and chat rooms and network with companies, sponsors and exhibitors. **Their journey during a LiveOn Digital Event is organized in distinct areas:**

- **Lobby**, is the introductory area of a LiveOn Digital Event. Here you may find useful information on the topics, program and speakers of the conference you wish to attend and perform your registration and login.
- **Stage** is the place where the sessions and proceedings of the conference happen, for you to attend in real time, submitting questions to the speakers and participating in relevant polls and surveys.
- **Agenda** is where you will find information in details on the event program (and speakers, where relevant), make your personal attendance plan and get notified on the sessions of your interest before they start.
- **Sponsors** (or Expo) area is the place to visit the event's sponsors/exhibitors stands, share your contact details with them, collect informative material specially prepared for you and communicate through video call and chat with their attending executives.
- **Networking** is the area where you may get acquainted with other online participants, exchange contact details with them and network through video call and chat.
- **Helpdesk** is where you can get support on LiveOn's function and operation during an event you attend.

An enriched user experience. A LiveOn Digital Event is the internet equivalent to a physical event: you can still enjoy the content and networking experience, but online. **It is a new enriched conference experience which offers:**

- **Easy navigation** and option to attend the full program of presentations and discussions, enriched with information on speakers and informative material available for users to download to their computers.
- **Constant interaction** among speakers and participants in an environment facilitating their online communication and enabling them to ask and answer questions, take part in online polls and network after the event.
- **An organized browsing environment** which offers participants and sponsors more opportunities to meet, get to know each other and exchange views, even in parallel with conference presentations and discussions.
- **Digital stands for sponsors and exhibitors**, with increased options for targeted promotion, presentation areas and videos, download links for visitors and the possibility for sponsors' executives to discuss and network with visitors.
- **Option for participants** to interact with sponsors' executives (by visiting their digital stands) but also with other attendees (peer-to-peer networking), since LiveOn allows participants to view who is live and online!
- **Data reports** on the impact of sponsors' presence and detailed data on meetings held at the online event.

Why Go LiveOn? Here's the answer in a few words:

Advanced Web Technology
Secure Cloud environment
Built with Customer Success in mind

Low & scalable cost of use
Fully customizable to each event
Quick & friendly user interface

LiveOn 1.0 | Features List
